

MILITARY DRILLS AT HIGH SCHOOL

The weekly meeting of the city board of education was held last night in the council chamber. The board decided to place a hardwood floor in the assembly room at the new high school building and the school dances will be held there this winter.

The finance committee reported a cash balance of \$23,112.49 now on hand.

The matter of purchasing supplies for the sewing department of the high school was referred to the supply committee with power to act.

It was decided that the lawn at the new school would be dispensed with, as more playground room was needed at that school.

Bills amounting to \$3,634.15 were presented and allowed.

Raymond Morrissey and Anna Belnap, graduates of the Ogden High school, were awarded scholarships to the University of Utah.

Miss Grace Frost was appointed as a substitute teacher in the Ogden schools.

Captain W. E. Kneass was consulted as to the practicability of giving a course in military science in the high school. He, with Principal Cross and Superintendent Mills, looked over the grounds and the captain said it was feasible, as there was a good room to hold drills in the winter and he thought the grounds were large enough to hold outside drill in good weather. If Captain Kneass is employed by the board he will also take charge of the study hall during the day. The matter was referred to the teachers' committee to report.

The office at the high school needs furnishing and the recommendations made by the superintendent were referred to the supply committee with power to act.

The superintendent recommended that shower baths be placed in the basement of the high school for the use of the various athletic teams. As it is, the boys have to go to the Sub-High to prepare for the athletic field and this practice is causing some friction between the two schools. The matter was referred to the supply committee with power to act.

Bids for furnishing tables and outfitting the chemistry laboratory were received last night and they were referred to the building committee.

The bids were as follows: John G. Ellis, \$3,207; E. C. Lumber company, \$2,880; Flowell Building company, \$2,474; and Charles J. Hufnagel, \$2,327.

Bids for the bronze name plate to be placed on the new high school were opened and they were also referred to the building committee. The name plate will read: "This building erected A. D. 1909. Ground presented to the city of Ogden by Fred J. Kiesel and Julia Kiesel."

The bids were as follows: Winslow Brothers, Chicago, \$62, f. o. b.; Bureau Brothers, Philadelphia, \$90, f. o. b.; and the Standard company of Chicago, \$80, f. o. b.

'CROSS CONTINENT IN AUTO

El Paso, Texas, Sept. 17.—C. A. Root, driver and W. M. Jones, in a Packard car, racing from New York, arrived here this morning having traveled 3,827.12 miles. The car left New York August 22. The Mitchell and Cleveland cars were also in the race, the Mitchell dropping out in Chicago. The Cleveland has not been heard from for several days.

The Cough Syrup that
rides the system of a cold
by acting as a cathartic on the
bowels is

**BEES
LAXATIVE
COUGH SYRUP**

Bees is the original laxative cough syrup. Contains no opiates, gently moves the bowels, carrying the cold off through the natural channels. Guaranteed to give satisfaction or money refunded.

SECRET SERVICE TO PROTECT TAFT

To the average citizen who is accustomed to travel when and wherever he chooses without thought of danger except that incident to the method of travel which he chooses, the precautions taken by the secret service bureau of the United States government to guard the president when he travels abroad from dangers as the hands of a fanatical bomb thrower or a religion-crazed individual who imagines that he has served his God and his country by assassinating the executive head of the nation, will prove interesting.

The secret service bureau of the government is composed of men who have been trained to vigilance, to detect criminals, and who are past-masters in the art of discovering plots against the government and its officials.

Itinerary Given Bureau.
When the president of the United States contemplates a visit to remote sections of the country his first act is to place his itinerary with the city at which he proposes to stop, in the hands of the head of the secret service bureau at Washington, D. C. The best men in that department are detailed to visit each city on the proposed route. Usually they reach the points at which the president intends to visit several weeks in advance of his arrival.

Keeps Bureau Informed.
If a program of any nature is planned, the secret service man sets all of the details and wires or writes them back to his chief in Washington. If some known follower of an anarchist band happens to be along the proposed route this fact is also communicated to the headquarters of the bureau. Every detail looking to the safety of the president is followed, and instances are on record where presidents have without warning suddenly changed their plans altogether. The reasons have sometimes not been made known, but the secret service bureau knows why.

Secret Service Men Here.
When President W. H. Taft comes to Utah this month he will find that secret service men have already preceded him; that every provision has been made by them for his safety and that police departments of every city he visits have been consulted by the secret service men employed by the government for just such occasions.

L. C. Wheeler, one of the best men in the secret service department, has been here for several days assisting the committee having in charge the entertainment of the president and his party when they visit Ogden. Mr. Wheeler, with a cordon of other officers, will be on the streets hours before the parade begins, alert and watchful of every person who attempts to get too close to the president. So cautious are these officers who are employed to guard the national executive that no announcement is made until within a few minutes before the parade begins as to what order the carriages or other vehicles are to proceed in the parade.

Local Officers Co-Operate.
In addition to the detectives who accompany President Taft as his bodyguard whenever he leaves the executive mansion and the secret service men sent out in advance to prepare for his arrival, an extra force of detectives and patrolmen will be ever watchful of the crowds of eager people who will crowd around the president as soon as he leaves his private car.

The railroad companies which will handle the presidential party will use every means possible to facilitate the journey through the west. Rights of way will be allowed over all other trains so that any unnecessary delay of the special train will be obviated.

**HIGH SCHOOL FOOTBALL
LEAGUE MEETS TODAY**

There will be a meeting of the managers and captains of the teams in the State High School Football league, in Salt Lake today. Coach Brown and Captain Douglas of the Ogden High school will be present at the meeting.

The league is composed of teams representing the Salt Lake High school, Granite High school, All Hallows college and the Ogden High school.

A schedule of games will be arranged and rules and regulations pertaining to eligibility will be adopted.

There is some opposition in Ogden in allowing the Granite High school to come into the league this year, as it is claimed that it violated the agreements last year, which caused a heavy deficit in the treasury of the Ogden High School Athletic association.

**TO DELIVER LECTURE
AT WEBER ACADEMY**

Frank H. Leonard, C. S. E., of Brooklyn, N. Y., will deliver an address at the Weber academy next Monday evening. Mr. Leonard is a disciple of the Christian Science belief. He began his studies at the Boston Latin school but ill health prevented him from continuing his course. He embraced the Christian Science faith in 1885 and became interested in the advancement of the belief in 1897 and entered the Massachusetts Metropolitan college at Boston, Mass., in 1900. Later he was appointed on the board of lectureship. Mr. Leonard was connected with the Stony Creek Coal & Coke company of Pennsylvania as vice-president and secretary for several years.

**SAYS HER HUSBAND
HAS EXCITABLE TEMPER**

Asserting that her husband, J. T. Bishop is of a cruel and inhuman nature, that he has violent passions and an excitable temperament, and that he is quarrelsome, Mrs. Effie Pearl Bishop has instituted divorce proceedings against him.

Mrs. Bishop furthermore asserts that at one time Bishop swore he would shoot her, but she escaped from the house and stayed all night with a neighbor. She says she is afraid to live with him and wants immediate relief.

She says Bishop is an engineer, earning from \$125 to \$175 a month and that he has real estate in Ogden.

Mrs. Bishop asks for general relief, the custody of two-year-old James Lowie Bishop, cost of court, temporary alimony, and that the house in which she is living be transferred from her husband to her.

BETH STONE, AT THE ORPHEUM NEXT WEEK.

There is no doubt about the sterling worth of the bill which the Orpheum will put on for the coming week, beginning with tomorrow night's performance. Beth Stone's Faraway Circus has been described as "a trust for children from six to sixty" and it is true that everyone finds something appealing in this quaint European novelty. Watson introduces a donkey, dogs, cats, roosters and a tiny pig in his routine of comedy, and the results obtained by persistent training of presumably harmless creatures, such as rabbits are astonishing. Altogether it is a humorous performance but one which ranks foremost among the exhibitions of animal training.

Walter Schrade and Lizzie Hulvey present a clever comedy offering called "A Theatrical Agency," which, besides having an interesting and bright dialogue, introduces singing and dancing which are attractive, and gives Miss Hulvey an opportunity of displaying a number of effective costume changes.

One of the funniest comedians London has yet sent to us, according to the New York estimate, is Griff, the "Juggling Joker," who, assisted by his son George, will be a feature next week. He came to America unannounced and he made such an unexpected success that a tour over the entire circuit was immediately arranged. He juggles and talks and his patter is very funny for he is that rare

product—an Englishman with a spontaneous sense of humor.

Harry H. Richards, well-known in America, comic opera fields, is assisted by Miss Dorothy Daley and Miss Adele Ferguson in presenting an operetta called "Love a La Mode." It is described as replete with comedy situations, high class musical selections and effective costumes. The plot is cleverly conceived and the comedy is happily and consistently introduced, while the musical interpolations help to hold the attention and enliven the telling of the story.

Herbert and Willing are well-known minstrel comedians who have a new laughing creation they call "Oh! Man." It is a combination of burnt-curly witicism and darkey song deftly put together for laughing purposes only.

Miss Beth Stone, the pretty danseuse who is known as "the top-turvy teacher" has left Charles Frohman, after several seasons with "The Little Cherub" and various other musical comedies, to appear in vaudeville.

Miss Stone has a style quite her own, and besides dainty dancing, and some others of the whirlwind variety. She has a rare personal attractiveness and dresses her numbers beautifully.

The Knodrome with its moving pictures and the Orpheum orchestra will complete the bill. There will be a regular-priced matinee Wednesday and Saturday. Reserved seats may be had for 15 cents. This week's bill is an attractive one for children and seats should be secured early.

quilty yesterday morning. Shortly after the verdict was rendered, Dr. Wells and his attorney, Judge A. J. Weber of Salt Lake, left for this city. Sentence is set for October 11.

At that time Dr. Wells says he will apply for a new trial on the ground that at least one member of the jury was so drunk that he could hardly maintain his equilibrium in the jury box. If the request for a new trial is not granted, an appeal will be made to the supreme court.

The case originated in 1902 when Dr. Wells was in Logan practicing his profession. After his arrest he was released on bond, and left immediately for the east, forfeiting the bond and keeping out of sight for a number of years. Finally he got in with "The Great Fed Don," who claimed to have a wonderful discovery for the removing of gallstones, cancers, tumors and other afflictions without the use of the knife.

Dr. Wells ultimately landed in Salt Lake City in 1907 with "Fer Don," who remained here for five months, having an office in the Windsor hotel and conducting nightly meetings in various parts of the city. A feature of his boasting was a negro band. Six weeks after his arrival here Dr. Wells, who was operating under the name of "Boy Phenomenal," assisted by "The Marvelous Lopez," was recognized and rearrested. He was taken to Logan for trial and after being found guilty was sentenced to serve four years in the state prison.

He appealed the case to the supreme court and that body ordered a new trial in the lower court. In the meantime Dr. Wells was released on \$1000 bond and went on with "Fer Don" to California, where he dropped the name Boy Phenomenal and operated as a European expert. He returned to Logan last June when his trial was to have been held. But it was continued and he went back to California. He came here again a month ago and stood trial. Dr. Wells says that he has sworn affidavits to prove that one of the jurists who tried him was drunk during part of the trial.

During the visit here in 1907 of Fer Don and his staff trouble broke out in full force. After establishing a local reputation and exhausting a large part of the local field the crowd spread out. Dr. Earl Beers of Salt Lake was engaged and dubbed "The Marvelous Lopez." He was used here for a month under that name but was later sent to Ogden and opened up an office as the Boy Phenomenal. During leisure hours he got into trouble with Mrs. Fred Walker, wife of Fred Walker of Salt Lake and as a result was attacked by Mr. Walker and beaten so badly that he died. Mr. Walker was tried for murder and found not guilty.

Dr. Wells continued work here for a month afterward under the name Boy Phenomenal and then went to California.

**BOSTON OPPOSES THE
SPOKANE FREIGHT RATES**

Boston, Sept. 18.—The Boston Chamber of Commerce yesterday

adopted resolutions condemning the proposed Spokane freight rates. It was voted to send delegates to the hearing at Spokane, September 23. The chamber also will file at once a petition of intervention at Washington.

**NEW RAILROAD
IN OLD MEXICO**

El Paso, Texas, Sept. 18.—Dr. F. H. Pearson, head of the Canadian capitalists who recently purchased the Rio Grande, Sierra Madre & Pacific railroad and secured control of the Chihuahua & Pacific, announced here last night that the two roads will be extended from El Paso to the Pacific ocean, with an outlet at the mouth of the Rio Mayo, in Sonora, the project to involve \$15,000,000. Surveys will begin in sixty days. In connection with the road, Dr. Pearson said, a company would be formed later for Panama and coast business. He also stated that the new road will give a shorter route to the Pacific than the Southern Pacific and will give the shortest route to central United States points from Central and South America. On the completion of the Panama canal, it will afford the quickest traffic the United States to the west end of the canal.

It is considered a step to head off another projected extension by Rock Island interests west through Arizona from the line of the El Paso & Southwestern.

The new road will extend from El Paso to Madera on the Rio Grande, Sierra Madre and Pacific, thence connect with Temascalco on the Chihuahua and Pacific thence to Lake Juanita on the road, thence to Minaca and from there 300 miles of track will be built to the coast, following the valley of the Rio Madre. The average of this 300 miles of road will be \$40,000 a mile.

**EASIER TO REACH
THE SOUTH POLE**

Battle Harbor, Sept. 18, Via Marconi. Wireless to Cape Ray.—Commander Peary, in explaining what he considered the scientific value of polar explorations, said he had taken soundings of the sea from Cape Sheridan to the pole which supplemented similar data taken on the other side by Nansen and Cagni. He argued that north polar exploration is much more difficult than the same work in the Antarctic. In the Arctic, the work must all be done in one season, while the south pole eventually will be reached by several seasons of work, it being possible for exploring parties to push forward and hold the ground covered instead of getting near the winter quarters of the limits of civilization.

**WESTERN UNION WILL BE
ABLE TO LIQUIDATE.**

New York, Sept. 18.—A statement issued yesterday by Robert C. Clowery of the Western Union Telegraph company, relative to the recent sale of the company's holdings of New York telephone stock, says:

"The sale of the company's holdings of New York Telephone stock amounting to about \$16,000,000 par value, will enable the Western Union company to liquidate a considerable part of its bonded debt and will provide for a long term of years, the necessary funds for improvement and construction."

BROKE AUTOMOBILE RECORD.

Grand Rapids, Mich., Sept. 18.—At the Western Michigan state fair yesterday, Ralph De Palma of New York, broke the world's automobile record for twenty-five miles. His time was 22:55.25. The previous record was 25:35, held by De Palma.

**NUMBER OF INDIANS
DROWNED IN COLUMBIA**

Victoria, B. C., Sept. 17.—F. Eastman, lightkeeper at Race Rocks, reports having seen a Columbia river boat capsized and eight or ten Indians, including women and children, drowned yesterday during a southwest squall. A Nesquiot Indian who arrived at the local agency today reported that he was the only occupant of a Columbia river boat which capsized yesterday near Race Rocks. He believed the lightkeeper was confused

by seeing bags of ballast which he had on the windward side of the boat but the lightkeeper is insistent that he saw a number of persons drowned and says that his wife and assistant witnessed the tragedy.

**JAPANESE CONSUL IS
SERIOUSLY INJURED.**

Honolulu, Sept. 17.—Consul General Uyemoto of Japan is seriously injured and his coachman is believed to be dying as the result of an accident last night when their carriage was struck by an automobile in the suburbs of Honolulu and both the consul general and his driver were thrown out.

The chauffeur conveyed the consul and the unconscious coachman to the Japanese hospital, where the consul general lies in such serious condition that he is unable to make a statement as to the accident. His chief injury, the physicians say, is to his spine, which is badly affected.

The chauffeur, after leaving the injured men at the hospital, sped away, but the facts as to the accident were obtained later by the police.

**NEGROES THREATEN
WHITES**

Muskogee, Okla., Sept. 17.—Placard ing the neighborhood with warnings that unless the three white men in the strictly negro town of Afta, Okla., left town immediately death would follow, negroes last night, dynamited the store of one of the whites at that town. The building was partially demolished. The white merchants declare they will remain. Further trouble is expected.

The maid was in the garden, hanging out her clothes.
Down flew a blackbird and perched upon her nose;
"What makes your clothes so very white," the saucy blackbird said,
"I washed them with Fels-Naptha," replied the pretty maid.

Most labor-savers cost money.
A new-fangled washer, an electric sad iron or a gas range mean you have to pay out a good sum to start with.

But Fels-Naptha Soap will save you more work than all these other things put together and it costs no more than other soaps.

Labor-saving and economy are combined in Fels-Naptha.

And labor is not the only thing saved. When you wash with Fels-Naptha Soap the Fels-Naptha way, in cool or lukewarm water, it saves the clothes.

No boiling to soften them; no hard rubbing to wear them out.

They last twice as long.

No matter how big the washing is, it doesn't take half as long as if you boiled and hard-rubbed the clothes.

They'll be sweeter, whiter and cleaner.

Isn't it worth trying?

Be sure and use cool or lukewarm water in Winter or Summer—no boiling—according to directions on the red and green wrapper.

UNIVERSITY OF UTAH, Salt Lake City, Utah

The Head of the Public School System of Utah

4 Schools The School of Arts and Sciences, the State Normal School, or the School of Education, the State School of Mines, and a School of Medicine are embraced by the University of Utah.

33 Departments Including the Department of Law, which is part of the School of Arts and Sciences.

125 Instructors Many of them graduates of the greatest Universities of this country and Europe.

1618 Students Including the Summer of 1909. With the children of the Training School, more than 2,000 young people received instruction in the University buildings last year.

\$860,000 Equipment Embraces 10 brick and stone buildings, 92 acres of grounds, and other University property.

\$150,000 Laboratory Equipment Most of the apparatus, machinery, and tools, etc., are new and of the very best.

Co-Educational Women are admitted to all departments. The Dean of Women looks after the welfare of the young women students.

Strange, Is it Not? That some of us go away to school when students come from the East and West, the North and the South, and the far countries of the earth to attend the University of Utah.

Particulars Registration of students, September 16th, 17th, and 18th. Fee \$10.00. After the 18th, fee \$12.00. Regular work begins September 20th. Inquire of local agents for railroad rates. Catalog, Picture Bulletin, and complete information sent free upon request.

Address:—University of Utah, Salt Lake City, Utah
